

## Clean Sweep, Inc.

...offers state-of-the-art GPS tracking on its power sweeping fleet.

---

### **Our GPS System Usage Offers Safety and Security:**

Clean Sweep, Inc. monitors and analyzes nightly sweeping performance with Global Positioning Satellite (GPS) systems mounted on-board each of its power sweepers.

Both Clean Sweep, Inc. and its customers receive many benefits from our operation of GPS-equipped sweepers. Routine analysis and other available information include:

- 1. Arrival and departure times for each property, street or construction site being swept.**
  - a. For our parking area customers, this feature allows us to be sure adequate time is allotted for thorough sweeping of your property. We also analyze this data on a routine basis to ensure your pricing is correct for your property. Over time, we have adjusted rates both up and down as a result of our GPS tracking.
- 2. Sweeper speeds while on the property or job.**
  - a. We are able to ensure proper speeds are followed for optimum pickup performance.
  - b. Monitoring provides ongoing compliance with our company safety program.
- 3. Sweeper path is shown on parking area properties.**
  - a. To ensure front, sides and rear of property are adequately swept.
  - b. An 'electronic bread crumb trail' details the sweeper's path across each property.
- 4. Sweeper stops/durations at all locations while working on each client account.**
  - a. This ensures work proceeds diligently and responsibly so that all scheduled areas are serviced.
  - b. Provides oversight to ensure that special services are provided, e.g., all trash cans are relined.

***Clean Sweep, Inc. consistently maintains dependable, exceptional service by combining our onboard sweeper GPS system with manager's on-site inspections.***
